Test Planning: Ars Technica.

Scenario 1: As a user, Alice wants to sign out.

Given	Alice is logged in;
And	Alice is with Front page opened;
And	Alice clicks on account options;
And	A dropdown content appears;
When	Alice clicks in Sign Out button;
Then	Alice is signed out;
And	The Front page refreshes.

Scenario 2: As a user, Alice wants to open the Tech feed.

Given	Alice is with Front page opened;
When	Alice clicks in Tech button;
Then	The Tech feed page is loaded.

Scenario 3: As a user, Alice wants to open the Store.

Given	Alice is with Front page opened;
When	Alice clicks in Store button;
Then	The Store page is loaded.

Scenario 4: As a user, Alice wants to register an account.

Given	Alice does not have an account;
And	The Register page is opened;
And	Alice fills the fields Username, Email and Password with acceptable data;
And	Alice succeed on captcha verification;
And	Alice checks EULA checkbox;
When	Alice clicks in Register button;
Then	Account is created;
And	The welcome page is loaded.

Scenario 5: As a user, Alice wants to login to an account.

Given	Alice already has an account;
And	Alice is not logged in;
And	Alice clicks in Sign In button;
And	Alice is with the login page opened;
And	Alice fills the fields Name/Email and Password correctly;
When	Alice clicks on Log In button;
Then	Login is successfully done;
And	The Front Page is loaded.

Scenario 6: As a user, Alice wants to open the Twitter contact.

Given	Alice is on the Front page;
And	Alice scrolled down to the page's footer;
When	Alice clicks on the Twitter icon;
Then	The Twitter page is loaded.

Scenario 7: As a user, Alice wants to watch the latest ARS video.

Given	Alice is on the Front page;
When	Alice clicks on the Latest ARS Video;
Then	A modal with the video shows up;
And	The video starts automatically.

Scenario 8: As a user, Alice wants to change the layout of the page to list.

Given	Alice is on the Front page;
And	Alice opens the dropdown content from the sandwich button;
And	The layout of the page selected is grid;
When	Alice sets the layout to list mode;
Then	The page refreshes;
And	The page goes to list mode.

Scenario 9: As a user, Alice searches for specific content.

Given	Alice is on the Front page;
And	Alice opens the search field;
And	Alice writes something;
When	Alice searches it;
Then	The search page showing the results is loaded.

Scenario 10: As a user, Alice searches with special characters.

Given	Alice is on the Front page;
And	Alice is with the search field opened;
And	Alice writes special characters (e.g.: ! " # $ % &);
When	Alice searches it;
Then	The search page showing the results is loaded.

Scenario 11: As a user, Alice makes a search with blank space.

Given	Alice is on the Front page;
And	Alice is with the search field opened;
And	Alice types a blank space;
When	Alice searches it;
Then	The system does not search it.

Scenario 12: As a user, Alice refreshes the page and the last theme set is kept.

Given	Alice is on the Front page;
And	Alice opens the dropdown content from the sandwich button;
And	The theme of the page selected is Light;
When	Alice sets the theme to Dark mode;
Then	The page refreshes;
And	The page goes to Dark mode.

Scenario 13: As a user, Alice searches with over the limit amount of characters.

Given	Alice is on the Front page;
And	Alice is with the search field opened;
And	Alice types a amount of characters over the limit;
When	Alice searches it;
Then	The system does not search for it.
